

SWEET HARVEST FOODS

RETAIL & FOODSERVICE HOT HONEY

Hot honey started with a college student traveling in Brazil and has grown into one of the most sought after flavor combinations! (*Datassential, 2023*) The sweet plus heat combination continues to grow on menus, in retail stores, and beverages.

As experts in sourcing, production, and distribution of natural sweeteners, Sweet Harvest Foods is seen as a reliable end-to-end solution for the best options to fulfill product application needs and formula requirements.

We crafted our hot honey to incorporate a mild flavored honey that pairs well with the heat of our pepper blend, ensuring the honey doesn't compete with the complex pepper flavors. Leaving customers with a versatile, on-trend condiment that can be drizzled over everything from pizza to desserts, and even in craft cocktails.

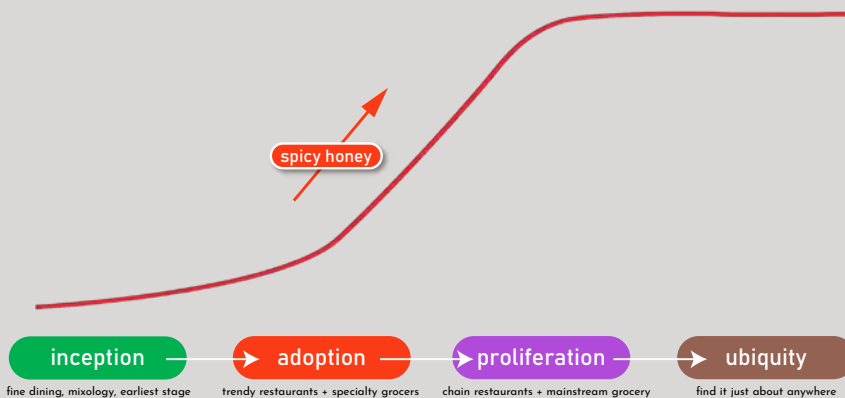

“Sweet and spicy pairings on menus are up 38% in the last year, and hot honey is projected to outpace nearly all other culinary and beverage flavors by 2027.”
